

EXTENDABLE SELF-CONTAINED CLEANING DEVICE

ABSTRACT

A cleaning device comprising an extendable wand and a cleaning fluid delivery system. The extendable wand has a first end and a second end, with the extendable wand comprising a cleaning fluid reservoir located at the first end thereof and a cleaning head located at the second end thereof. The cleaning fluid delivery system is at least partially located within the extendable wand for delivering cleaning fluid in the fluid reservoir to the second end of the extendable wand. Pressure of the cleaning fluid within the cleaning fluid delivery system is independent of an extendable length of the extendable wand.
